

A secure, reliable Internet connection...

Now that really is priceless.

A Fast, Efficient, and Secure Fiber Network

While nearly every industry relies on a network connection for their day-to-day activities, financial institutions have a particular need for secure, reliable Internet services. Financial institutions must be able to quickly and easily access customer information for credit checks, loan applications, and other general activities. Bluebird Network understands these requirements and can support your business with our state-of-the-art fiber optic network:

- Network activity will take place over a secure and dedicated connection
- High bandwidth and low latency guarantees a speedy, real-time connection with reduced downtime
- Robust, high-speed network ensures your business provides easy, reliable access to your online services
- Connect all your locations, even your most remote branches and offices
- Colocation space is available within our underground data center to securely store backups of digital records off-site
- Excellent disaster recovery plan within our data center, with dedicated customer support available 24/7

What Bluebird Network can do for you

With Bluebird Network, your business will have access to a faster, more affordable, private Internet connection. The Bluebird Network solution will make your day-to-day operation more productive, secure, and cost-effective.

You'll be able to serve your customers more reliably and efficiently than ever before, combining the best possible network performance with the fastest speeds and tightest security. At Bluebird Network, we know that success is all about good connections.

Utilizing Bluebird Network fiber equips your business with:

- Fast Internet Access
- Full Gig E-Services
- Private Metro Fiber Networks

Secure and Accessible Data Center

Bluebird Network offers collocation, gigabit transport and gigabit Internet services through the Bluebird Underground Data Center. Housed in a mine and encased by natural limestone, this facility provides protection from natural and man-made disasters. As a SOC 2 Type 2 compliant data center, Bluebird Underground is committed to meeting and exceeding ever-evolving industry standards, critical component redundancies and maintaining a 100% uptime assurance to our customers.

Because success is all about good connections
