

**Custom-Made**

# Colocation Space

## COLOCATE WITH CONFIDENCE

The Bluebird Underground Data Center provides the colocation space you need today with the capacity to expand your data capabilities tomorrow.

## TAILORED TO YOUR NEEDS

We offer third, half, and full cabinet solutions. Need more? We can provide custom cage colocation measured by square footage.

### SECURE

With our SOC 2 Type 2 Certification, 24/7 manned guard stations, mantraps, biometric security measures and more, you can rest easy knowing your data is safe.

### GREEN ENERGY

Three diversified utility feeds and a closed-loop water cooling system allows us to operate with 45% green energy.

### CONSISTENT COOLING

Our underground location partnered with the latest technology allows for consistent temperature control of 65-68 degrees Fahrenheit year round.

### 100% UPTIME GUARANTEE

Powered with V16 Rolls Royce engines, our three 2MW generators and UPS battery plant ensure that your data is always at your fingertips.

## WHY BBU?

Housed under 85' of limestone in Springfield, MO, the 6MW Bluebird Underground Data Center offers safety, security and reliability. The underground advantage protects customer data from natural and manmade disasters.

### SERVICE INTERRUPTION GUARANTEE

We strive to always do right by our customers. Report any service interruption to us immediately. If it's due to power interruption, temperature control issues or humidity, we will credit you for the interruption.

### UPGRADABLE SERVICES

**Midwest vPOP** - As a carrier hotel alternative, the Midwest vPOP enables you to establish a virtual presence at the top tier data centers throughout the Midwest in one location at BBU.

**Cloud Connect** - Dedicated private bandwidth to the cloud service provider of your choice. Get direct connections to the services you need.

**BBU vConnect** - FREE fast and secure virtual data transport available for all BBN and BBU customers with minimum purchase of one third cabinet space.
